

ELIMINATE THE LAST LEAK YOU WILL EVER HAVE WITH THE LAST ROOF YOU WILL EVER NEED

Your professionalism, your ability to perform the work at our residence and the ten year material and labor guarantee were key to us in selecting RV Roofing Solutions to do the work.

From the start, we were impressed with your customer service and your effort to keep us informed on when you would arrive to start the work. You worked around our schedule and the uncooperative weather. You removed and replaced the AC cover and the vent covers. We did not have to prep the RV for you or clean-up after you. The whole experience was painless.

The new acrylic roof looks great. The fact the acrylic roof is maintenance free really put a smile on our faces.

Cheryl & Bob C

RV ROOFING *Solutions*

THANKS TO THE SCIENTIFIC ADVANCES IN MODERN TECHNOLOGY

A liquid Acrylic RV roofing system is available that will eliminate roof leaks once and for all. So, if you have a leak now or just want to prevent it before a problem starts, we have the long-term roofing solution for you!

PROFESSIONAL · QUALITY · CARE BEST PREVENTATIVE MAINTENANCE

I was glad that I didn't try to do the job myself as just the roof prep alone was an all-day job. The roof is extremely white and looks as if it was installed at the factory, several people have commented on how well the roof looks and the quality of the workmanship. I'm impressed with their work ethic and I highly recommend RV Roofing Solutions and this Acrylic roofing system.

WHY SHOULD I GO WITH **RV ROOFING** *Solutions*

100% MAINTENANCE FREE

This is the most advanced Acrylic coating on the market today!

It will never dry hard causing it to crack or peel like most roof coatings.

It will stay flexible at all seams and joints expanding up to 300%.

When finished it is a seamless membrane so there is no seams to ever leak.

Eliminates re-caulking the seams or performing roof treatments of any kind.

No more hard to remove ugly streaks running down the side of your RV from roof oxidation and deterioration.

Completely impervious to the sun's harmful UV rays.

A nonporous membrane with a high algacide content that mold and mildew will not stick to.

Energy efficient white membrane reduces inside coach temperature at least 15 or more degrees helping ease the load on the air-conditioning unit.

Withstands the most constant severe desert sun to cold 40 degree subzero temperatures.

The highest UL 790 Class "A" Fire Rating available.

10 YEAR MATERIAL & LABOR NO LEAK GUARANTEE

IT REALLY CAN BE **THIS SIMPLE** TO PROTECT YOUR RV

COMMON QUESTIONS

Q: Why is it important to protect my roof?

A: We're all aware of the extensive damage a water leak can cause:

- 1) Ugly stains on walls, ceilings, furniture, and carpet.
- 2) Soaks your insulation making it completely ineffective.
- 3) Weakens the support structure to your walls and ceiling.
- 4) Causes growth of mold, mildew, algae, and bacteria which left unchecked can aggravate allergies and health conditions; Not to mention the cost to you can be thousands of dollars in repairs.

Q: Will this Acrylic roofing system work on all RV roofs?

A: Absolutely, metal, fiberglass, EPDM rubber even the newer TPO material. This Acrylic material is designed to bond directly to every type of roofing material used on RVs today.

Q: What about maintenance of an Acrylic roof?

A: 100% maintenance free, absolutely nothing for you to do other than washing the roof once a year using a soft brush and your favorite soap.

Q: What will my RV roof look like years from now?

A: This Acrylic goes on white from day one and will stay white for many years to come never turning grey, yellow or any color in between.

Q: Is there a warranty?

A: You bet, the same 10 year no leak materials and labor guarantee that's been offered for the past 20 years on any roof installed by our professional installers, now compare that to a 90-day labor warranty offered by most RV facilities for a new replacement roof, you could pay \$10,000 or more.

Q: Where is the work performed?

A: We come to you, or you come to us. Approximately 80% of the roofs we do are right in driveways, on the street or in RV Parks, we are entirely mobile and come right to your door, the work is neat as a pin, no mess whatsoever and if necessary, you can still stay in the coach while the work is being performed. We also have installing locations in various cities in a few states if you prefer coming to us.

Q: How long does it take?

A: An experienced installer will average 2 to 3 days to do the job properly depending on the size of coach, condition of the existing roof and weather conditions; this is not fast work; it is done slowly and patiently with great care to detail and outcome.

Q: Ok the big question how much to get it done?

A: That is the best part, it is very cost effective, from 30% to 50% less than the cost of a new factory roof. So depending on the size of your coach that could be a savings of thousands of dollars.

Q: So how do I take the next step?

A: Just give us a call, tell us a little about your coach and what you feel your needs are, we will explain the entire process and answer any questions you may have.
