

Resume of Candidate for NW Area FRVA

Donald Scherck

dscherck@comcast.net

F 497210

Hello, I am offering up my name to fill the Position of NWFRVA President. I have been a member of FRVA/FMCA since 5/1/2019. My wife Debbie and I have been members of the Puget Sounders Chapter since May of 2022 and have been very active in that chapter since.

Debbie has been chapter President since 2024. Since joining the Puget Sounders, we have been very active in helping to build our membership numbers and expand the participation at rally's.

We attended our first major rally in Gillette in 2023 where we were alternate delegates for non-attending NW chapters and got our first taste of the Governing of FMCA and have been learning the goods and bads ever since. We have since attended Tucson, Redmond, and Gillette again for major rally's volunteering to work as well as serving as alternate delegates when required.

On the personal side I was born in British Columbia, Canada and lived there till 1986 when I married Debbie and immigrated to Blaine, Washinton to join her and our daughter Jennifer on our journey together. At that time, I owned a beachfront Condo, which I owned for 20 years. I have been a dual citizen since the 20 teens. I am a retired Truck Driver with close to 4 million miles of experience in many different types of trucking and I have been retired for 11 years. I was raised in a family-owned hospitality business which offered me excellent small business experience, as well as real world experience, as I helped with the business and met people from different walks of life.

Upon graduating from High School after a couple of years of several different jobs I became a truck driver and as they say the rest is history. During my 20 years of condo ownership, I served multiple years as a building rep on the board of directors and President of that Association as well. One of the things I learned during that time was to do my fiduciary duty to serve everyone's interests not just my own. Also, during my driving career, I spent 7 or 8 years
