President, Webmaster - May 2025 – Present

GLAMA

Volunteer with trams 2024 and games in 2025

Senior VP – June 2025 - Present

Summary of Qualifications

Spent working life in manufacturing with many management titles in different departments. Last position, for 36 years, was a VP/COO in a 150-person locally German-owned company, which had over \$50 million in sales. This position allowed me to travel and respect all fellow travelers. Learned the power of people working in teams and the importance of good policies, procedures, and work instructions.

I have been a “towable” person since the '80s and love to explore this great country and meet people. Widowed twice and was a caregiver to both. I spend Winters in Tucson.

Summary of Goals

We can only build/use a *Bridge to the Future* by ensuring basics are in place to support the members and organization. These basics are people, good systems, and documents. It is important that we have fun together and create destinations people want to go to. Of course, our need is to inform others and create a desire for them to join. Yes, big challenges!

I believe I can help in building this bridge!
